

Making and booting flash for Android through PC

Directed by MZ Minhaz

A. Install driver in manually through ""Device Manager""

~~~~Action (Manu bar) >> Add legacy hardware (Manu)~~~~

**Note: If problem then deactivate "signature" process.**

**way to deactivate :**

1. Hold "Shift" + Restart PC.
2. Go to --> Troubleshoot --> Advanced Options --> Startup Settings
3. Then hit the restart button and select the signature e/d entry button.
4. It will enable the non-signature installation for that only reboot.
5. & goes to default after next reboot automatically..... Done

### **B. Making Flash :**

1. Click on ""Load packet"" and load (.pac) file (FactoryDownload - R2.9.9015)
2. Click on ""Start Downloading""
3. plug in cable with PC & Power off phone.
4. Hold ""Down Volume"" button of phone and plug in phone with PC.
5. Holding the button till the downloading pop up bar doesn't show in.
6. Release the button and wait till the process shows finished.
7. Press the "Stop Downloading" button and exit phone from pc.... Done

**Note : Don't unplugged phone in the process mode, or it can software crushed.**
